SUMMARY

DevOps & Middleware Engineer with 4+ years of experience in CI/CD implementation, infrastructure automation, and AWS cloud operations. Skilled in Docker, Kubernetes, and Infrastructure as Code for building scalable and reliable systems. Strong expertise in managing middleware platforms including WebSphere, JBoss, WebLogic, Tomcat, and Apache. Proven ability to streamline deployments, optimize performance, and enhance system reliability in Agile environments.

SKILLS

DevOps Tools: Jenkins/GitHub Actions, Git, Maven, Docker, Kubernetes.
Cloud: AWS (EC2, EKS,S3, EBS, ELB, Auto Scaling, CloudWatch).
Infrastructure as Code: Terraform
Middleware: WebSphere, JBoss, WebLogic, Tomcat, IBM HTTP Server, AHS
Scripting: Shell Scripting (Bash), Python
Monitoring: Prometheus, Grafana
Messaging: WebSphere MQ, Kafka
Security: SSL/TLS, LDAP, TAM,TDS, IkeyMan,
OS: Linux (RHEL/Ubuntu)
Other Tools: ServiceNow, Remedy, IBM ISAM/TAM/TDS

EXPERIENCE

DevOps & Middleware Engineer **Worldpay PVT LTD, Pune** **May2025 - Present**

- Implemented CI/CD pipelines using **GitHub Actions (cloud/AWS)** and **Jenkins (middleware environments)** to automate build, test, and deployment **workflows** for Java applications.
- Managed enterprise middleware platforms including **IBM WebSphere, JBoss (EAP/WildFly), Oracle WebLogic, Apache Tomcat, IBM HTTP Server, and Apache HTTP Server**, ensuring high availability and secure production operations.
- Automated build and release processes using **Maven and Jenkins**, reducing deployment errors and improving release efficiency.
- Containerized applications using **Docker** and deployed workloads on **Kubernetes**, **enabling scalable and resilient microservices** architecture.
- Provisioned and managed **AWS infrastructure** (**EC2, S3, EBS, ELB, Auto Scaling**) using **Terraform (IaC)** for consistent and repeatable deployments**.**
- Implemented monitoring and alerting **using CloudWatch, Prometheus, and Grafana**, improving observability and reducing incident resolution time
- Developed automation scripts using **Shell scripting and cron jobs** to proactively monitor system health (CPU, memory, disk, hung threads, JVM issues)
- Managed Linux environments, troubleshooting issues and **supporting production** systems with **99.99%** uptime.
- Performed **installation, configuration, patching, and upgrades** of **middleware platforms and Java environments, including JVM tuning and production hardening.**
- Administered **WebSphere MQ** handling queue manager configuration, troubleshooting, and messaging reliability.
- Conducted **performance tuning and root cause analysis (RCA)** using thread dumps, heap dumps, and GC logs to improve system stability
- Handled critical production **incidents (OutofMemory, Hung Threads, MQ issues, CPU spikes), ensuring 99.99% uptime**
- Collaborated with **Dev and QA teams** in **Agile environments**, improving deployment frequency and release cycles
- Delivered **on-call support for cloud and middleware environments, handling production incidents, troubleshooting failures, and ensuring minimal downtime through proactive monitoring and automation.**

Middleware Engineer **Tata Consultancy Services Limited, Pune** **Dec-2021 to May2025**

- **Hands on experience** in administering **IBM WebSphere Application Server**, **JBoss**, **IBM WebSphere MQ**, **Tomcat** & managing web servers like **Apache** and **IBM HTTP Server**, while leveraging DevOps tools such as **Jenkins** for streamlined operations in **Jboss**.
- Extensive hands-on experience in Proficiently executing **Installation**, **Configuration**, and Upgradation of (**WebSphere & Jboss**) Application Server and adeptly handling JAVA SDK **upgrades**, **Jboss patching, JVM parameter**/argument tuning, as well as proficiently managing **deployments** and crucial security activities such as **LDAP-based User creation**, **Database user password change**, and **SSL Configuration in IBM WebSphere Application Server** and **Jboss (EAP+WFLY).**
- Expertise in **WebSphere MQ** administration, including configuration, **queue** creation, **MQ configurations, patching, installation and** support for various middleware-related activities.
- Successfully orchestrated and executed **Build** deployments using **Jenkins** pipeline for **IBM WebSphere Application Server** and **JBoss Application Server**, ensuring seamless and efficient software delivery. Also have knowledge about **DevOps** tools **Docker, Kubernetes and git**.
- Proficiently oversee user management, **profile creation**, **server configuration**, and policy implementation for production servers in **IBM WebSphere Application Server, Jboss Application Server and Jenkins**
- Managed Application Servers. Expertly develop and maintain architectural changes, fostering secure, resilient, and containerized production environments with **round-the-clock support** by Managing **Jboss profiles** like **Domain and Standalone.**
- Effectively utilized various tools, **including Jenkins, IBM ISAM / TAM / TDS, Performance Tuning Toolkit**, **Ikeyman**, **Thread Heap and GC Analyser, and Remedy** / Service now for change management
- Automation and configuration management using **Shell Scripting**, **Jenkins.** Setting cron jobs for generating alerts for any malfunction into the system such as Hung Thread detection, **high disk usage, heap exhaustion, CPU spike**, Clone session increment which help detect issues before escalations and avoid severities and **SLA**.
- Professionally adept at conducting in-depth analysis with **thread dumps**, **heap dumps**, and **GC logs** to identify and resolve issues in middleware systems. My competence lies in delivering thorough **root cause analyses,** enhancing overall middleware administration.
- Professionally adept at conducting in-depth analysis with **thread dumps**, **heap dumps**, and **GC logs** to identify and resolve issues in middleware systems. My competence lies in delivering thorough **root cause analyses,** enhancing overall middleware administration.
- Proficiently managing and providing support for frontend web-based URLs, I have leveraged **RBAC** utility to enhance security within the environment. By implementing role-based access control.
- Effectively tackled exceptions, such as **Hung Threads**, Out Of Memory (**OOM**), **ORA**, and **MQRC** issues, CPU Starvation, **Port Conflicts**, and **Create or Wait Exceptions**, **Messaging engine** issues, ensuring seamless operations.

CERTIFICATION AND TRAINING

- AWS Cloud Practitioner (CLF-C02)
- IBM official WebSphere Application Server Training
- IBM official MQ Admin training
- Apache Kafka training

ACHIEVEMENTS

- Recognized by TCS with the prestigious XCELERATE Warrior Award gaining the title kickstarts your journey towards achieving your aspiration for continue success in journey
- Commended by TCS with the Applause for Team Award, recognized as a role model to colleagues

EDUCATION

- **Diploma :**
- Vishweshwarayya Polytechnic, Tq. Almala, Dist Latur - 413512 06/2015 - 6/2018. Courses Civil Engineering

- **Bachelor's of Engineering :**
- Sinhgad Institute of Technology & Science, Pune - 411041 06/2018 - 6/2021, Courses Civil Engineering
-
